

## Peak Company Profile

## Proven Peak Performance

Peak is an international company with a reputation for innovation and excellence in the design and manufacture of Down Hole products. Our extensive range of Well intervention tools, innovative solutions and operational product support has positioned us as leaders in our field.

## Peak Products

All our products are designed with operations in mind. We are committed to maximising functionality through flexibility while at the same time ensuring our products remain extremely robust and simple to operate. This philosophy minimises inventory requirements and provides tools that are quick and safe to service in the field without compromising quality. Peak is an ISO 9001:2008 certified company and to ensure we provide all our customers with the best possible solutions, products and support we use an in-house design and programme management system called the Administrative Information Management System (AIMS). AIMS provides complete traceability of the engineering process from engineering drawings through to assembly and shipping of tools and is the core of our stringent engineering quality control system.

## Peak Solutions

With offices in Perth Australia, Aberdeen Scotland and Dubai UAE, we have an international team dedicated to providing fully engineered solutions specifically tailored to meet your needs. With years of experience in understanding Slickline and the operational problems that can occur, our technical team is perfectly positioned to meet your objectives and turn concepts into functioning tools. Whether it's re-working customer-owned equipment, the manufacture of non-standard adapters or supplying redress kits to retrofit existing designs, Peak has the flexibility to provide your company with the right solution.

## Peak Rental Services

Peak maintains a large inventory of standard and specialist type tooling ranging from our *Ultra Heavy Duty (UHD) Fishing package* to our patented *SIM Lock Retrievable Monobore Bridge Plug system*. Our comprehensive stock eliminates the problems of delays caused by corporate CapEx processes and manufacturing lead times - ensuring the immediate supply of specific tools - whenever and whatever your operational needs. All our products are supplied with informative 3D data manuals and redress kits to ensure our equipment is easily maintained.

Example: 3D Data Manual

## Peak Operational Services and Product Support

Our experienced technical sales force offers comprehensive operational advice and can also supply experienced wireline personnel, fishing specialists and SIM System engineers to support our own specialist range of tooling and service the major wireline providers and oil and gas operating companies.

## The Peak Difference

When you work with Peak, you work with a leading international company committed to meeting all your operational objectives and needs. Our expertise and experience guarantees you:

- A broad product range designed with strength, simplicity, flexibility and safety in mind
- 100% in-house proprietary designs
- Responsive, flexible personalised service with a technical sales force capable of offering complete operational advice from point-of-sale to execution
- In-depth practical and theoretical training to maximise your understanding of the equipment.

## PRODUCTS

### Peak Fishing Tools

- HD-FRC Pulling Tool - Jar Down to Shear
- HD-FRC Pulling Tool - Jar Up to Shear
- FRC-GLV Pulling Tool
- IN-FRC Pulling Tool
- Heavy Duty Pulling System
- Releasable Overshot
- Non-Releasable Overshot
- Releasable Spear
- Non-Releasable Spear
- Wireline Centre Spear
- Wireline Retrieval System
- Tapered Wire Finder Spear
- External & Internal Multi-Pin Running Tool
- Indexing Tool
- Sidewall Cutter
- Modular Drop Bar System
- Peak Power Cutter
- Slip Over Centraliser
- Slip Over Roller Centraliser
- HD Dual Fish Neck Sub
- Multi-Action Top Sub (MAT Sub)
- Integral Bell Guide
- Orientation Sub

### Peak Debris Recovery / Removal Systems

- Broaching System
- Drive Down Bailer
- Pump Bailer
- Hydrostatic Bailer
- Tubing Hanger Wiper Tool
- High Temperature / High Strength Magnet
- Expandable Junk Catcher
- Junk Catcher
- Wire Scratcher
- Radial Brush System

### Peak Flow Control

- SIM System
  - SIM Plug
  - SIM Straddle
  - SIM Gaslift Straddle
  - SIM Lift (Top Latch Interchangeable Choke)
  - SIM Hanger
- Pump-Out Sub
- Large Bore DST Plug & Nipple
- Standing Valve
- Downhole Orifice Choke
- Gaslift Orifice Sub & Sealing Prong
- Flow Activated Safety Valve (FASV)
- Large Bore Gauge Hanger

### Peak Toolstring

- Compact Toolstring
- Fluted Centraliser
- Fluted Roller Centraliser Sub
- Stem
- Roller Stem
- Spang Jar (Mechanical Link type)
- Tubular Jar
- Linear Jar
- Accelerator
- Peak Power Jar
- Rope Socket
- HD Dual Neck Rope Socket
- Mechanical Weak Point Rope Socket
- Multi-Function Rope Socket
- 90 degree Knuckle Joint
- Knuckle Joint
- Swivel - High Load
- Swivel - Bearing Type
- Wireline Crossover

### Peak Utility Wireline Tools

- Safe Enclosed Pull Test Sub
- Gauge Cutter
- Blind Box
- Combination Gauge Ring / Wire Scratcher
- Wire Scratcher
- TRSCSSV Hold-Open Sleeve
- Gauge Carrier
- Dual Gauge Carrier
- Jar Down Tool
- LIB
- Toolstring Lifting Sub

### Peak Ultra Heavy Duty (UHD) Toolstring

- 2 11/16" Multi-Function Releaseable Rope Socket
- 2 11/16" Accelerator
- 2 11/16" Knuckle Joint
- 2 11/16" Peak Power Jar
- 2 11/16" Linear Jar
- 2 11/16" Roller Sub
