

PEAK E-NEWS

Welcome to Issue 25 of Peak e-News.

We thank everyone for their positive comments about the appointment of Tony Jordan in the Middle East in last month's issue and trust that the move will allow Peak to provide a more responsive service in this region. Tony Jordan recently visited our Perth headquarters where he had the opportunity to familiarise himself with our operations and meet the Peak team. Tony's full contact details are listed below. In this issue we announce the further appointment of Lesley Milton to support European Operations. On the technical front we demonstrate product refinement rather than innovation with the new Radial Brush System which is now available to the market.

PEAK RADIAL BRUSH SYSTEM

Peak have expanded the Debris Recovery / Removal range of tools by developing the Radial Brush System. The interchangeable brush rings with a 360 degree brush face are designed to clean nipple profiles or seal bores effectively without damaging the polished face. The brush rings can be supplied fitted with bristles of different materials to suit the application. As standard the rings are supplied with Phosphor Bronze bristles. The three rings are assembled independently and can rotate to change the effective brushing face during the reciprocating motion of the wireline run, aiding debris removal. The large through bore further assists the cleaning motion by preventing any cushioning effect by maximising bypass & allowing debris to flow through the Brush during the upward and downward motions. For more information, please contact info@peakwellservices.com

NEW APPOINTMENT - LESLEY MILTON

We are very pleased to announce the appointment of Lesley Milton (pictured right) taking up the new position of Sales Support Coordinator in our Aberdeen Office. Lesley has extensive experience in the Well Intervention industry having worked for 22 years with companies such as ASEP & Weatherford / Petrolina. Lesley's appointment will further support Peak UK's expanding business and bolster the already focused customer service in this region.
